Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/539,125	Applicant(s) WATKINSON, CHARLES	
	Examiner CYNTHIA SZEWCZYK	Art Unit 1791	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 21 May 2009.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

1. 112 2nd paragraph rejection of claims 1 and 5 and 103 rejection of claims 1-6 over JENSEN in view of WADSWORTH have been withdrawn in view of amendments.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-7 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 1 recites the limitation "the stream is traveling unenclosed". This new limitation does not appear to be supported by the original disclosure and drawings as figure 1 shows that the glass stream is enclosed by the heating coils. Page 4 line 20 of the original specification also describes that the heating coil is surrounding the glass stream.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 1791

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by WILLIAMS et al. (US 5,104,432).

WILLIAMS teaches an apparatus for forming fibers of material comprising means for producing a heated stream of molten material (10 in figure 4), means for feeding the stream in a substantially vertically downward direction (17 in figure 4), means for receiving the downwardly directed stream and for forming fibres therefrom (24 in figure 4), and means for effecting a change in the temperature of the stream subsequent to the production thereof (21 and 22 of figure 4). WILLIAMS discloses that fibers are produced (col. 1, lines 5-9). Figure 4 shows that the temperature changing means are means for directly heating the stream by application thereto of electric current (col. 5, lines 58-62) while the stream is traveling unenclosed in a vertically downward direction.

The instant claim does not invoke 112 6th paragraph since the written disclosure does not provide structure for the means plus function language.

Regarding claim 2, WILLIAMS discloses that the apparatus may contain a cooling jacket at the outlet of the furnace (col. 3, lines 35-37).

Regarding claim 3, see the discussion of claim 2. WILLIAMS discloses that the cooling jacket may contain air or water (col. 3, lines 35-37).

Regarding claim 4, WILLIAMS discloses that the apparatus may contain flow control means (col. 4 line 65 – col. 5 line 2).

Regarding claim 5, see the discussion of claim 1.

Regarding claim 6, see the discussion of claim 4.

Regarding claim 7, see the discussion of claim 1. Figure 4 shows that the temperature means (21 and 22) are spaced apart from the stream.

Response to Arguments

6. Applicant's arguments with respect to claims 1-6 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
